

Wax Dipping Wooden Hive Equipment

Funny Farm Apiaries, LLC.

17 Oak Road, Mertztown PA. 19539

610-401-8317

Preserve your woodenware for years to come by hot wax dipping. Hot wax dipping is the placement of various beehive components, or parts, in hot molten wax. The term 'dip' means a brief immersion into a liquid. However, when apiarists dip their hive parts in molten hot wax, it is usually for periods of up to 15 minutes depending on the reason for which the dipping process is being used.

The purpose of dipping hive components is to preserve wooden hive parts, so they are protected from the effects of weather, fungi and other causes of decay.

Wax Dipping Wooden Hive Equipment

New clean, dry, unpainted woodenware, nothing plastic.

Bottom board -- \$3.00+tax.

Deep -- \$5.00+tax.

Escape Boards -- \$2.50+tax.

Feeding Trays/Shims -- \$2.75+tax

Entrance Reducer -- \$1.00+tax.

Inner cover -- \$2.50+tax.

Medium -- \$4.00+tax.

NUC Box -- \$3.00+tax.

NUC BB -- \$2.50+tax.

NUC Cover -- \$2.50+tax.

NUC (Plywood) -- \$5.00+tax.

Slatted Racks -- \$2.50+tax.

Top Cover -- \$3.50+tax.

Wooden Stands -- \$5.00+tax.

NOTE: Any pieces with Plywood will be \$1.00/pp extra.

Unfortunately, the plywood sucks up a lot of wax and costs a lot more to dip.
